1 Introduction

This is a sharp looking report template I got from an R blogger [Bull, 2011].

The pages after the first page have a nice looking header, footer and page number.

2 Section 1

In the Org file you can see some hidden R code that computes a linear regression and returns the results shown in Table 1.

	Estimate	Std. Error	t value	Pr(> t)
(Intercept)	21.6487	3.4114	6.3459	0.0000
x	-0.1737	0.3103	-0.5597	0.5770

Table 1: Example Table
